

MINING

TIP HEAD & HAUL ROAD MAINTENANCE, MOURA, QLD

ANGLO COAL DAWSON MINE

Client:	Anglo Coal
Location:	Dawson Mine, QLD
Machine(s) used:	BH-1950MS (12t Mine Spec module)
Scope of Project:	The Dawson Mine produces around 12 Mtpa of coking & thermal Coal for export. Significant expansion of the open cut mine & increase in the haul truck fleet by a further 32 Cat 797 trucks created a need to improve tyre life & cycle times.
Details of Project:	A Broons BH-1950MS Impact Roller & Case STX280 tow tractor was supplied as a turn key package & has been used to improve the running surface on tip heads, compaction of haul roads & various other civil works.
Performance:	Targets for reducing tyre damage & improved cycle times are being achieved with the Impact Roller contributing to this.
