

## INDUSTRIAL PROOF ROLLING UNCONTROLLED FILL, LONDON, U.K.

### WILLESDEN JCT WASTE TRANSFER CENTRE

<b>Client:</b>	Con-Form Ltd
<b>Location:</b>	London, England, U.K.
<b>Machine:</b>	BH-1300 (8t module)
<b>Scope of Project:</b>	2m layer of granular controlled fill overlaying natural ground around 45,000m <sup>2</sup> in area.
<b>Details of Project:</b>	This site had seen many uses over several hundred years & was developed into a new waste transfer centre. Slab-on-ground buildings & heavy duty pavements were required.
<b>Performance:</b>	Site was proof rolled to refusal with settlement monitored every 10 passes. Settlement ranged from 0-175mm with an average achieved of 70mm across the entire site.
