

LANDFILL PROOF ROLLING CAPPING LAYER, CANBERRA, A.C.T.

MUGGA LANE LANDFILL

Client:	Kenoss Contractors
Location:	Canberra, Australian Capital Territory (Australia)
Machine:	BH-1300 (8t module)
Scope of Project:	Expansion of existing landfill to a second cell to cater for anticipated demand until closure in 2015.
Details of Project:	Preparation of subgrade, partly comprising capping on first completed cell & partly on natural ground/fill prior to placement of synthetic liner.
Performance:	Significant settlement was observed indicating an increase in density, project completed to the satisfaction of all parties.
